

Smart positioner upgrade

BVT Sweden's service personnel has years of experience with pneumatics, actuation and commissioning. We offer retrofits, spare parts and upgrades to existing pneumatic actuators.

BVT understands the importance of a leakage free and smoothly operating actuation system, as it allows the regulating valve to operate at its fullest potential. As such, we offer complete or partial service for your actuation system.

We can replace the old pneumatic or electro-pneumatic positioner with a modern smart positioner. The upgrade is designed for existing IMI STI SC/V actuators, but BVT can also provide other upgrades upon request. Please contact sales@bvtsweden.com for more information.

Benifits

- ✓ Reliable valve operation by robust and proven design
- ✓ Very easy to install, configure and operate
- ✓ Quick calibration and commissioning
- ✓ 4-20 mA as standard

Options

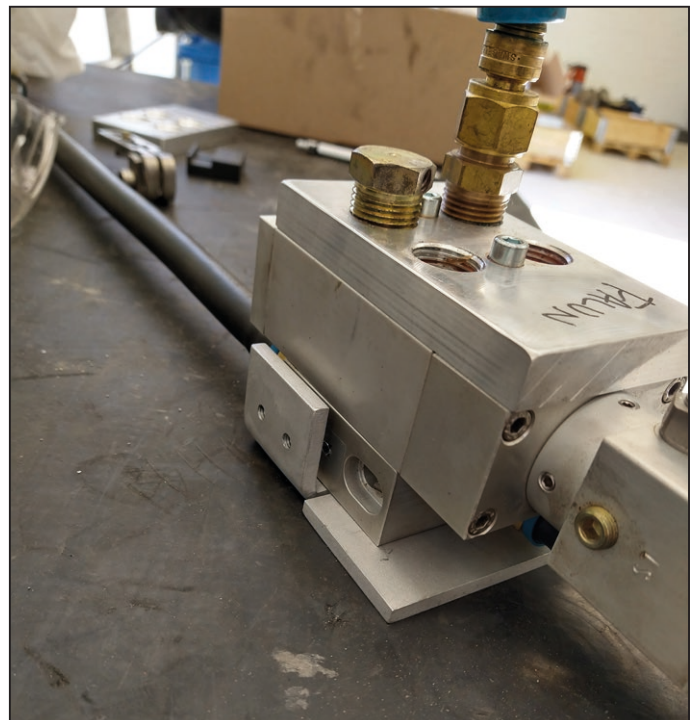

- ✓ Plug-in limit switches and 4-20 mA transmitter
- ✓ HART, Profibus or Foundation Fieldbus
- ✓ Gaugeblock
- ✓ Dome indicator

What's included

- ✓ D30 smart positioner upgrade
- ✓ Adapter plates, couplings and hoses
- ✓ Actuator cylinder soft goods
- ✓ Installation and commissioning
- ✓ Air lock and pilot valve soft goods
- ✓ Calibration and testing

D30 POSITIONER RETROFITTED TO STI ACTUATOR

MOUNTING BRACKET FOR PILOT VALVE
